To: Whom It May Concern

Subject: Letter of Reference

Zircadyne Process Equipment has been employed in the chemical industry since the early 1960's. Properly applied, designed and fabricated Zircadyne equipment has been shown to be virtually indestructible and has performed well for decades. As the largest producer of Zirconium mill products for the chemical process industry, Wah Chang has come to understand that a knowledgeable fabricator who has significant experience in designing and fabricating Zircadyne Process Equipment is often the key which determines the success or failure of a project.

The staff at TITAN Metal Fabricators represents the essence of this balance of experience and knowledge. Although TITAN itself is a new name in the industry, the personnel are seasoned professionals with a very results oriented, customer-first and innovative approach. It has been Wah Chang's privilege for the last 20+ years to enjoy a successful personal as well as technical business relationship with the individuals at TITAN. The balance of technical expertise, understanding of the market and the needs of the customer make TITAN uniquely qualified to assume a leading role in the marketplace.

I have no reservation in recommending TITAN Metal Fabricators to anyone who is considering the purchase of Zircadyne Process Equipment. If I can be of any assistance in providing further information regarding TITAN's capabilities, please do not hesitate to contact me.

Sincerely,

DOUG BRENIZER  
Manager, CPI Zirconium  
Wah Chang
